RETAIL SALES ANALYTICS REPORT

Executive Intelligence Report · FY 2023–2024 · 43,900 Transactions · 20 Stores · 4 Categories

TOTAL REVENUE	TRANSACTIONS	AVG ORDER VALUE	GROSS MARGIN
$2.47M	43,900	$56.24	32.5%
FY 2023–2024	Individual lines	Per transaction	After cost of goods

This report presents a comprehensive analysis of a simulated general-merchandise retail chain — 20 stores across four US regions. The data is modelled as a star-schema relational database (SQLite): one fact table, four dimension tables, 43,900 transaction rows — verified for referential integrity and cross-validated against Power BI outputs.

REPORT CONTENTS

01 **Executive KPI Summary**
— Key performance indicators and business health

02 **Revenue by Product Category**
— Category mix, margin analysis, concentration risk

03 **Store & Regional Performance**
— Regional breakdown, store-type analysis, top stores

04 **Customer Segment Analysis**
— Segment revenue split and strategic implications

SECTION 02

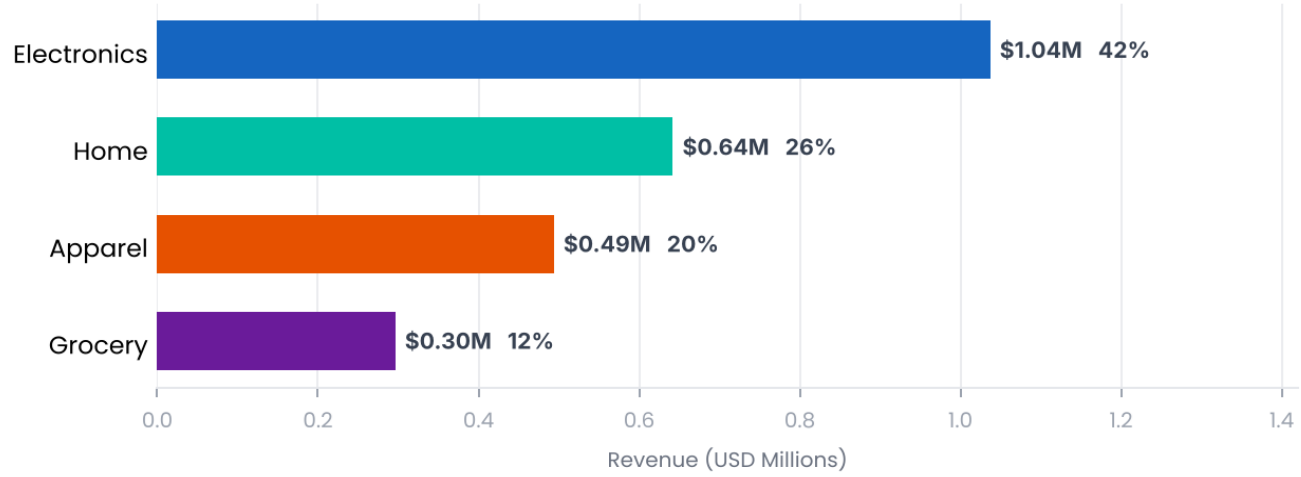

Revenue by Product Category

Analysis of revenue distribution and profitability across four product categories.

ELECTRONICS SHARE	HOME + APPAREL	AVG GROSS MARGIN
42%	**46.5%**	**32.5%**
Highest single category	Combined revenue share	Across all categories

Total Revenue by Product Category

USD Millions · FY 2023–2024

Category	Revenue (USD)	Share of Total	Gross Margin
Electronics	$1,036,871	42.0%	31.2%
Home	$641,872	26.0%	33.8%
Apparel	$493,748	20.0%	34.1%
Grocery	$296,249	12.0%	29.6%

KEY INSIGHT

Electronics drives 42% of total revenue — more than Home and Apparel combined.
Heavy single-category concentration creates inventory and demand-cycle risk.
Recommendation: grow Home (+8 pp target) and Apparel (+5 pp) to diversify the mix.

SECTION 03

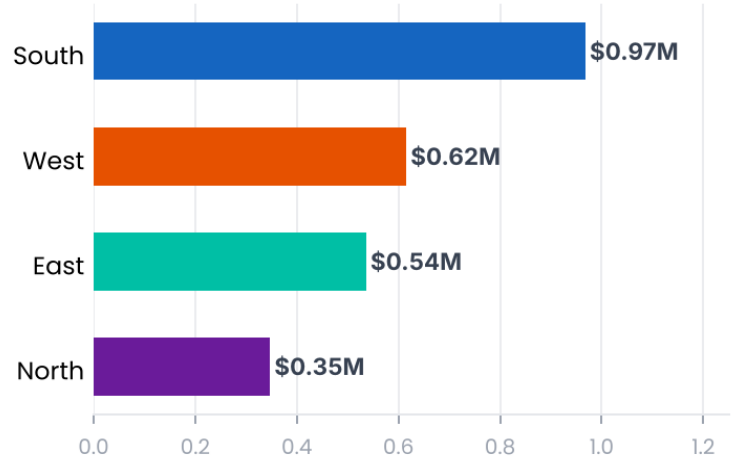

Store & Regional Performance

Revenue by US region, store-type distribution, and top-performing locations.

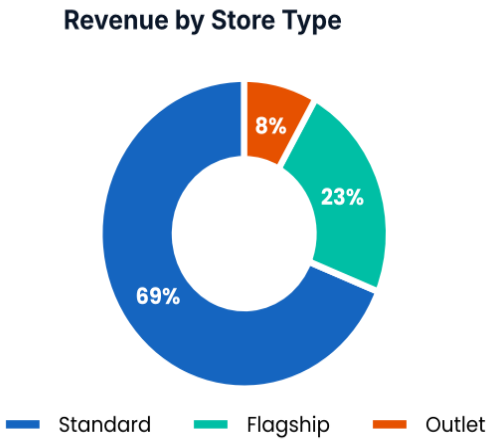

SOUTH REGION	STANDARD STORES	AUSTIN FLAGSHIP
$968K	**68.9%**	**$434K**
Leads 4 regions, 39% share	Revenue share by type	#1 store — 2× next best

Revenue by Region

USD Millions

Store Type Mix

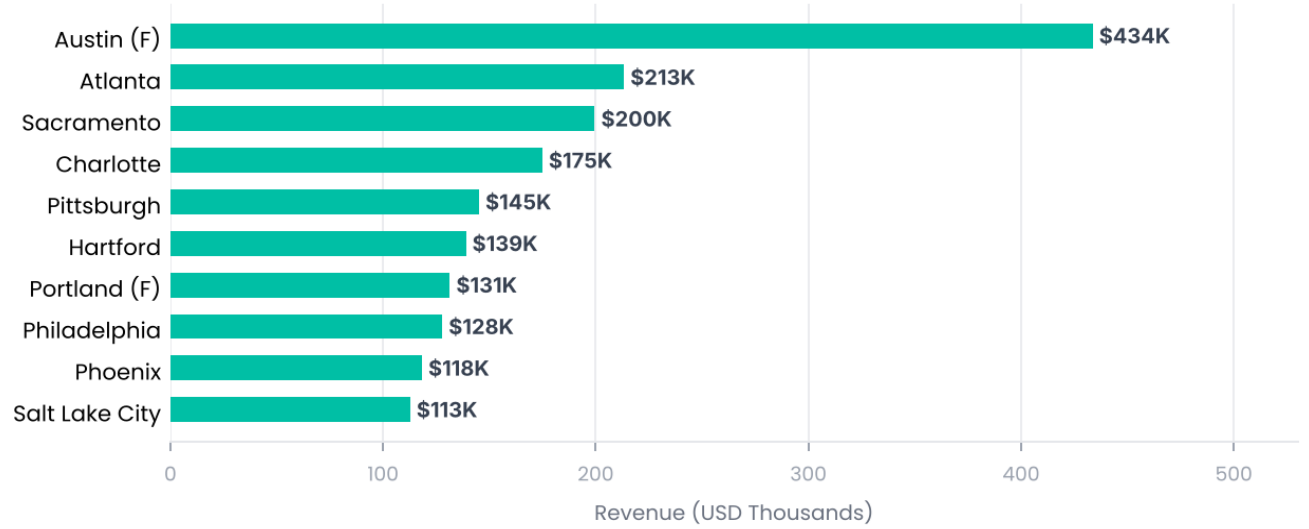

REGIONAL INSIGHT

South generates $968K vs North's $348K — a 2.8× revenue gap across geographies.

Flagship stores average $282K revenue each vs $121K for Standard — a 2.3× multiplier.

Top 10 Stores by Revenue

USD Thousands · = Flagship

STORE INSIGHT

Austin Flagship ($434K) is 2× the next best store (Atlanta $213K).

Top 3 stores account for 34% of total network revenue.

Replicating the Flagship model in West and North regions is a high-ROI opportunity.

SECTION 04

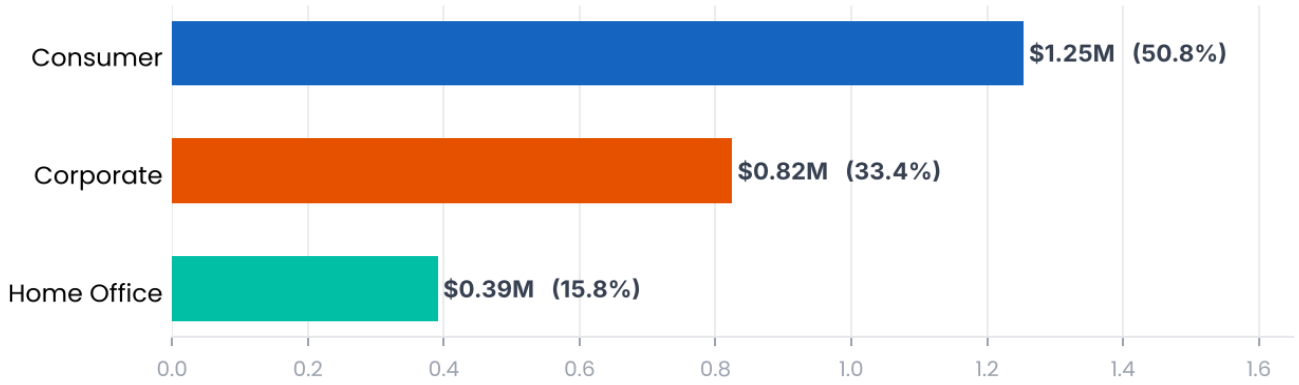

Customer Segment Analysis

Revenue by customer segment — Consumer, Corporate, and Home Office.

CONSUMER	CORPORATE	HOME OFFICE
50.8%	**33.4%**	**15.8%**
$1.25M revenue	$824K revenue	$391K revenue

Revenue by Customer Segment

USD Millions · FY 2023–2024

Segment	Revenue (USD)	Share %	Avg Order Value
Consumer	$1,253,432	50.8%	$54.80
Corporate	$824,306	33.4%	$59.42
Home Office	$391,001	15.8%	$57.11

SEGMENT INSIGHT

Consumer dominates at 50.8% but Corporate shows higher average order value ($59.42). Home Office segment, though smallest, reflects remote-work demand growth potential.

STRATEGIC RECOMMENDATIONS

1 Diversify category mix — reduce Electronics dependency from 42% to target <35% over 2 years.

2 Expand Flagship format — replicate Austin model in West (Seattle/LA) and North (Chicago) regions.

3 Develop Corporate channel — higher AOV ($59.42) justifies dedicated B2B sales programme.

4 Activate South momentum — South leads all regions; leverage existing infrastructure for growth.
